

-Dave the Butcher, Beacon NY

ARCHITECTURAL (A):

Modern and post-modern, often geometric. Fewer traditional and historical references and usually emphasizing strong, simple forms, proportion, color, materials and textures over embellishments or ornamentation. Well suited both for complementing modern spaces or as contrasting pieces in traditional or “transitional” rooms. (examples: Foursquare, Cube, Disc)

CLASSIC (C):

Drawing on historical and global cultural themes, these pieces unite practical current sensibility with shapes and flourishes reminiscent of other times and places. Reflecting traditional aesthetics from all over the world use these pieces to enhance traditional rooms, as standouts in modern spaces, or to remind of past or aspirational travels! (examples: French Bistro, Butcher)

MODERN (M):

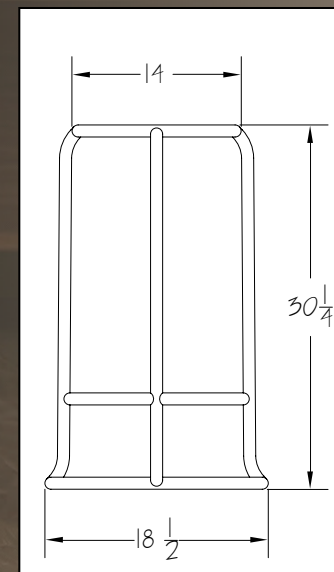

Celebrating sleekness and uncluttered silhouettes, our modern collection emphasizes form, proportion and function. Eschewing excess ornamentation, these pieces perfectly ground contemporary spaces, act as a subtle canvas for bold colors, or bring a sharp, updated edginess to eclectic and transitional rooms. (examples: Cube, Arc, Disc)

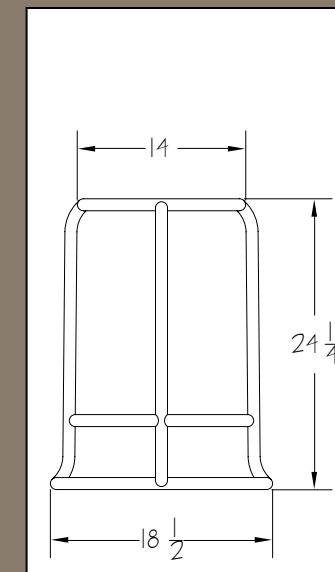

BELL STOOL [A,M]

Inspired by ancient tower bells, this classy multi-purpose stool boasts our all-welded steel durability and is available in black or white and accepts all stool top options.
